Shipping Charges – Recommended Approach

Bhoomija (bhoomija.in) · Prepared by Aniket Web Studio · October 2026

In one line: Shipping is charged by parcel weight – from ₹79 for light items like jewellery and stoles up to ₹599 for heavy pieces. **Product prices stay exactly the same.**

Why weight-based shipping

• No change to product prices.

• Fair to customers – a ₹1,195 necklace does not pay the same as heavy brass horses.

• Safe for Bhoomija – charges follow the same logic Shiprocket uses to bill us, so we don't lose money on heavy or bulky handmade pieces.

• Works on the current Shopify Basic plan – no extra app or cost.

Proposed weight slabs (India)

Parcel weight	Customer pays	Typical items
Up to 0.5 kg	₹79	Jewellery, stoles, dupattas, pouches, coasters
0.5 – 1 kg	₹129	Bags, cushion covers, runners
1 – 2 kg	₹199	Small figurines, mat sets, throws
2 – 5 kg	₹349	Lamps, planters, larger figurines
Above 5 kg	₹599	Bankura horses, durries, big sculptures

Starting suggestions. Before launch we check each slab in Shiprocket's rate calculator (pickup Kolkata, delivery to a far zone such as Kerala / North-East) and adjust so every slab covers the courier cost plus packaging.

Optional: free shipping above an order value

e.g. **free shipping on orders above ₹4,999**. Rewards bigger orders without changing prices. Can be added later once we see real shipping costs.

Dead weight vs volumetric weight (how Shiprocket bills)

Shiprocket checks a parcel two ways and charges **whichever is higher**:
• **Dead weight** – what the parcel weighs on a scale.
• **Volumetric weight** – space the box takes: **Length × Width × Height (cm) ÷ 5000**.

Item	Box size	Dead weight	Volumetric weight	Shiprocket charges
Necklace	15×10×5 cm	0.2 kg	0.15 kg	0.2 kg
Stole	30×25×4 cm	0.3 kg	0.6 kg	0.6 kg
Lamp	35×35×55 cm	1.5 kg	13.5 kg	13.5 kg

What this means: a light but large box (lamp, planter, mirror) is billed as if it were heavy. Our solution:

• For bulky items, the shipping weight in Shopify is set to the **higher** of actual weight and box-size weight – so the customer's charge matches what Shiprocket bills.

• Use **snug boxes** – less empty space means lower volumetric weight and lower cost.

• Small items (jewellery, stoles, pouches) simply use their actual packed weight.

Current status in Shopify

• Packed weights from the product sheet are already uploaded for most products.

• About 120 items (mostly dupattas and stoles) have no weight yet – a safe default of 300 g will be applied.

• Bulky items will get their box-size weight once packed box sizes are confirmed.

• Domestic shipping is currently ₹0 – it will be replaced by the slabs above once approved.

Decisions needed from you

#	Question	Options
1	Approve the weight slabs?	Yes / adjust after Shiprocket rate check
2	Free shipping above an order value?	No / Yes at ₹____
3	International orders at launch?	India only (recommended) / Keep international at ₹1,800 flat
4	Packed box sizes for bulky items (lamps, planters, mirrors, large sculptures, framed art)	Share L × W × H in cm

Rates shown are indicative and will be finalised against actual Shiprocket charges. Slabs can be reviewed after the first few weeks of orders.
